 C. justify
 b .align
 d. none of the above

Question (3) (10 marks 1 mark for each)

Match list A with the list B

No	A	B	Answer
1	text-decoration	Used to specify the bullet style or numbering style for the list. Valid values are disc, circle, square, decimal, lower-roman, upper-roman, lower-alpha, upper-alpha, and none.	
2	font-style	Defines the amount of space between an image hspace and The text surrounding it.	
3	font-family	The location and filename of the image to include	
4	font-size	A text string to substitute for the image in text-only browsers	
5	text-align	Defines a header cell in a table	
6	list-style-type	Specifies how text is aligned: left, right, center, or justify.	
7	Alt	Specifies whether text should be italicized. The three values are normal, italic, and oblique.	
8	Src	Enables you to specify the font used for text. You can choose families such as serif, sans serif, and monospace, or specific font names. You can also specify more than one font or font family.	
9	Vspace	Specifies which sort of decoration should be applied to the text. The values are underline, overline, line-through, blink, and none.	
10	<th>	Enables you to specify the font size in any unit supported by CSS.
